

CI Agent

Content Inspection Agent

Why Code Green Networks CI Agent

- Prevent confidential data from leaking via USB devices
- Create reports of removable device usage
- Create reports of confidential data copied to removable devices
- Alert and educate users when data handling policies are violated
- Support audit investigations
- Demonstrate regulatory compliance

TrueDLP™ Solution

Code Green Networks TrueDLP is a complete data loss prevention (DLP) solution that allows companies to effectively discover, monitor, control, and secure sensitive data, on the network, as it is used on desktops or laptops, or residing on end user systems and network servers. The TrueDLP solution is comprised of Code Green Networks Content Inspection Appliance, Content Inspection Agent, and the Content Inspection Management platform.

CI Agent Overview

The CI Agent provides total visibility and complete control over sensitive information residing on servers, laptops, and removable media. The CI Agent provides both **Endpoint DLP** and **Discovery**.

CI Agent Endpoint DLP

TrueDLP delivers powerful data loss protection for data in use on endpoint devices, providing visibility and control over sensitive information being copied to removable media or sent over wireless connections. Endpoint DLP provides both device level control and content aware inspection, allowing flexible policy-based enforcement. Detailed activity logging provides audit history information necessary to demonstrate compliance. Offline policy enforcement ensures protection for laptops and other devices even when disconnected from the network.

Endpoint DLP Key Benefits

- Extend Data Loss Prevention to laptops, desktops, and servers
- Provides visibility into file and device activity on endpoints
- Controls sensitive information being copied to removable media
- Restrict use to authorized users and devices
- Protect laptops even when disconnected from the network
- Comply with regulations by enforcing encryption of sensitive data
- Educate users on confidential data handling policies

Endpoint DLP Key Features

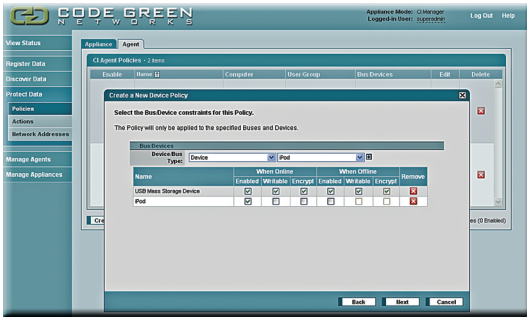

- Content aware monitoring and inspection policies
- Device level control, with read only, block, encrypt, and log actions
- Device and file activity reporting
- Online and offline policies
- Policy based encryption of sensitive data
- End user notification and remediation of violations

TrueDLP Products from Code Green Networks

CI-750 - Designed for smaller companies and branch offices

CI-1500 - Designed for mid-size and enterprise organizations

CI Agent - Designed for endpoint protection

CI Agent Discovery

TrueDLP Discovery locates and identifies sensitive data at rest on endpoints and servers across the network, providing visibility and audit reporting of potentially unsecured information. Automatic, configurable scanning of local and network shares using discovery specific inspection policies ensure sensitive content is discovered wherever it is located. Detailed audit logging and reports provide administrators with the information needed to demonstrate compliance, protect confidential information, and reduce data loss risk.

Discovery Key Benefits

- Locates and identifies sensitive content residing endpoints and servers
- Provides visibility and audit reporting of unsecured sensitive content
- Demonstrate compliance
- Reduce data loss risk

Discovery Key Features

- Configurable scanning based on endpoint, AD user/group, folders, and file types
- Content aware inspection
- Detailed audit logging and reports
- Scalable agent based discovery scanning

CI Agent Specifications

| | |
|------------------------------------|---|
| Supported Operating Systems | Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista |
| Policy by Computer | Apply a policy to all computers the CI Agent is running on, all computers in a specific Active Directory Domain or only to specific computers and computer groups |
| Policy by User | Apply a policy to all users, users in a specific active directory domain or only specific users and groups |
| Supported Devices | USB Mass Storage, iPod, iPhone, SD/MMC Card, Floppy Disk Drive, CD/DVD Drive, Digital Camera, USB Printer, Scanner, Palm OS device, Windows CE Device, Blackberry, Firewire Devices |
| Supported Buses | USB, Bluetooth, Firewire, Infrared |

About Code Green Networks

Code Green Networks delivers data loss prevention solutions that protect private employee and customer information and safeguard intellectual property across all electronic communications channels. The company's easy-to-deploy, easy-to-manage content inspection appliances rapidly detect and prevent potential data leaks, helping organizations automate compliance and mitigate risks from internal breaches that can result in loss of revenue, financial penalties and irreparable damage to a corporation's image, brand and customer loyalty.
